Student ID: 219548135

SIT210 Task 4.1P

Q1: Provide the screenshot capturing the output of the ls command in step 7) above.

The screenshot shows a MobaXterm terminal window connected to a Raspberry Pi at IP 192.168.137.148. The terminal displays the output of the `ls` command, listing the contents of the home directory. The output is as follows:

```
pi@raspberrypi:~$ ls
Desktop  Downloads  Music      Public    Videos
Documents MagPi      Pictures   Templates
pi@raspberrypi:~$ mkdir Rakyan
pi@raspberrypi:~$ ls
Desktop  Downloads  Music      Public    Templates
Documents MagPi      Pictures   Rakyan    Videos
pi@raspberrypi:~$
```

The terminal window includes a menu bar (Terminal, Sessions, View, X server, Tools, Games, Settings, Macros, Help), a toolbar, and a sidebar with a file explorer and session list. The status bar at the bottom indicates the software is an "UNREGISTERED VERSION" and provides a link to the professional edition.
