SIT210 Task 6.1P

Q1: In no more than three paragraphs, please describe the steps you took to setup remote connection. Using bullet points are much preferred.

1. Enable VNC by type *sudo raspi-config* at the terminal, choose *Interface Options*, choose *VNC* and enable it.
2. Type *Ifconfig* and look at the ip address
3. Make an new connection on VNC Viewer, and type the ip address as the host

Q2: Paste the screen capture here and submit the file as your submission for task 6.1P.
